

## MB4-AC 4-way manifold

ITE presents a new 4-way manifold without sight glass. New style composition disc gate valves ensure leak tight deep vacuum and higher pressure operation. When fully opened the valves have no obstruction in the flow path, resulting in very low flow resistance. This 4-way manifold can be used with refrigerants such as R410A, R32 and CO2 in subcritical applications.

### **Features:**

- High-density black aluminium 4 valve body without sight glass, with hook.
- Composition disc gate valves.
- 3 x 1/4" MFL and 1 x 3/8" MFL connections with extra blind fitting ends for easy hose storage.
- Possibility to panel mount.
- 3/8" vacuum port allows 4 times faster evacuation than ordinary manifolds.
- Durable non-slip surface, soft touch handles.
- MWP: 60 bar (870 psi).

### **Available versions:**

- With or without gauges.
- With or without hoses.
- Packed in carton or in a portable carrying case.
