1. AK-CC55 Introduction

The AK-CC55 is designed to replace AK-CC 4xx / 5xx. The document describes important details to be aware of when replacing an AK-CC 450, 525 and 550, and compatibility with Danfoss System Managers.

AK-CC55 Connect – Mobile Service APP

- Efficient installation and service

Visible upgrade on displays

- Plastic parts in grey
- White LED light

AK-UI55 Bluetooth

AK-UI55 Set

AK-UI55 Info

A number of new value-adding features have been introduced.

New features:

- 115/230VAC SMPS = **Reduced complexity**
- Bigger Plugs Modbus/Transmitter = **Easy mounting**
- Individual plugs for input/outputs = **Easy service**
- RJ12 connector display connector = **Fast connection**
- Different connector colors = **Less installation faults**
- Connector on option board = **Intuitive installation**

- White LED = **Modern design**
- 4 menu buttons = **Improved user interface**
- Bluetooth display = **Cable free access**

- AK-CC55 Connect app = **Time saving setup/service**
 - 24 hour History log = **Faster root cause analysis**
 - Intuitive Quick Setup = **No need for manual**

2.1 AK-CC550A vs AK-CC55 Single Coil – application mapping

Main remarks regarding compatibility of AK-CC 550A and AK-CC55 are highlighted in the table. Furthermore important differences are marked with red in the application overviews.

AK-CC 550A	AK-CC55 Single Coil	AK-CC55 remarks
Application: 1,2,3,4	Use application 1,2,3,4	Identical functions (be aware of differences in electrical connections)
Application: 5, 7, 8	Use Application 9	Use custom setup where relay 2 to 6 can be custom defined for 2'nd compressor, blinds, heat etc.
Application 6	Use application 5	A separate output has been defined for Drain valve - use Suction relay also for drain heater.
Application 9	Use application 7	Alarm output included. PWM (0/10 Volt) output and external SSR relay used for smooth control of rail heat. DI1 configured for S5b
Application 10	Use application 6	Two remote displays can be connected via RJ 12 connectors.
NA	Application 8	New application to activate an external humidifier via DO3. DI1 configured for 0 – 10 V input for HR% sensor.

2.3 Attention when replacing AK-CC 550 with AK-CC55!

Be aware when exchanging an AK-CC550 controller with a new AK-CC55 controller - new wiring principles!

- Pressure sensor has new connection – signal and ground are switched

AK-CC 550

AK-CC 55

- SPDT relays have a new wiring scheme – NO and NC terminals are switched (e.g. defrost heater on when should be off)

- Modbus has new connection scheme (A,B and screen)

AK-CC55 does not support two EEC coils connected to one AKV output.
Pressure transmitter can be shared between AK-CC 550 and AK-CC55.
DI2 defrost coordination can be wired between AK-CC 550 and AK-CC55.
EKA displays and cables can not be used for AK-CC55.
