BALL VALVES OF BRONZE AND BRASS

Altech Ball valves

The strength of Altech Ball Valves lies in its compact design as well as easy installation, operation and maintenance. The robust construction guarantees a long service life. The ball valves admit full flow with very little pressure drop in open position. The opening and closing of the ball valve only requires one quarter turn.

Installation

Separate installation instructions for Altech Ball valves may be found at <http://www.rskdatabasen.se/> under the relevant item number.

Use

Altech Ball valves are designed to be easily operated with the handle without additional aids or intervention. The valves function only as a shut-off valve and thus only in the open or closed position. The valves that normally remain unused in one of the two permitted positions must be opened and closed at least once a month.

General remarks

The maximum operating pressure decreases as the temperature increases. Maximum pressure and temperature limits are specified in technical specification.

Approvals

Altech Ball valves are CE-marked and type-approved by RISE. As the approval requirements differ between the different types of ball valves, the relevant approvals are specified under each ball valve.

Type approval: SC0591-16

For use in the following applications/temperatures/pressures: for tapping points with cold and hot tap water. The maximum permitted operating pressure is 1.0 MPa and where the momentarily water temperature does not exceed 95 °C, or never continuously exceeds 70 °C.

Type approval: SC0592-16

For use in the following applications/temperatures/pressures: for heating and cooling systems where the quality of the water can be compared with water supplied by municipal facilities. The maximum permitted operating pressure is 1.0 MPa and where the momentarily water temperature does not exceed 95 °C, or never continuously exceeds 70 °C.

Type approval: SC0593-16

For use in the following applications/temperatures/pressures: for cold and hot tap water. The maximum permitted operating pressure is 1.0 MPa and where the momentarily water temperature does not exceed 95 °C, or never continuously exceeds 70 °C.

Type approval: SC0594-16

For use in the following applications/temperatures/pressures: for cold and hot tap water. The maximum permitted operating pressure is 1.0 MPa and where the momentarily water temperature does not exceed 95 °C, or never continuously exceeds 70 °C.

Type approval: SC0596-16

For use in the following applications/temperatures/pressures: for heating and cooling systems where the quality of the water can be compared with water supplied by municipal facilities. The maximum permitted operating pressure is 1.0 MPa and where the momentarily water temperature does not exceed 95 °C, or never continuously exceeds 70 °C.

This product has been manufactured in accordance with the type approval with a decision on manufacturing control as well as those documents used as a basis for the decision on the type approval

BALL VALVES HEATING SYSTEM, COOLING SYSTEM, COMPRESSED AIR

Ball valves AL 3600

Shutoff ball valves for heating, cooling and air systems

Full bore ball valve with female thread. Valve body made of chrome plated brass with steel handle, grafoil gasket, chrome plated brass ball and blow-out proof stem.

Size range: DN8 – DN80

Pressure class: PN40 up to max. 95 °C

DN65 – DN80: PN25 up to max. 95 °C

Temperature range, water:

PN25: 0–150 °C, PN 40: 0–95 °C

Temperature range, air:

PN25: -10–150 °C, PN40: -10–95 °C

May be used for group 2 fluids according to the pressure equipment directive AFS 2016:1. RISE type approval no: SC0592-16. Ball valves within dimension DN40 – DN80 are CE marked according to PED 2014/68/EU.

Ball valves AL 343

Shutoff ball valves for heating, cooling and air systems

Full bore ball valve with male x female thread. Valve body made of chrome plated brass with steel handle, PTFE gasket, chrome plated brass ball and blow-out proof stem.

Size range: DN10 – DN50

Pressure class: PN40 up to max. 95 °C

Temperature range, water:

PN25: 0–150 °C, PN40: 0–95 °C

Temperature range, air:

BALL VALVES TAP WATER

Ball valves AL 3605, low lead

Shutoff ball valves for hot and cold tap water

Full bore ball valve with female thread. Valve body made of DZR brass CW511 L (lead content $\leq 0,2\%$), with steel handle or aluminium butterfly handle, grafoil gasket and blow-out proof stem.

Size range: DN10 – DN50

Pressure class: PN40 up to max. 95 °C

Temperature range, water:

PN25: 0–150 °C, PN40: 0–95 °C

Temperature range, air:

PN25: -10–150 °C, PN40: -10–95 °C

Used for installation with hot and cold tap water as well as air and vacuum. Can also be used for heating systems. RISE type approval no: SC0593-16.

Ball valves AL 3616, lead free

Shutoff ball valves for hot and cold tap water

Full bore ball valve with long neck and pipe ends for press fittings. Valve body made of DZR brass CW511 L (lead content $\leq 0,1\%$), with steel handle and grafoil gasket.

Size range: DN12 – DN54

Pressure class: PN16 up to max. 85 °C

Temperature range, water:

PN16: 0–85 °C, PN10: 0–110 °C

Temperature range, air:

PN16: -10–85 °C, PN10: -10–100 °C

Used for installation with hot and cold tap water, as well as refrigeration systems, in pipe systems of galvanized steel, copper or stainless steel. For air, neutral, non-flammable gases and flammable liquids. Can also be used for heating systems. RISE type approval no: SC0594-16.

Ball valves AL 5020, low lead

Shutoff ball valves for hot and cold tap water

Full bore ball valve with press fittings. Valve body made of DZR brass CW511 L (lead content $\leq 0,2\%$), with steel handle and blow-out proof stem.

Size range: DN12 – DN54

Pressure class: PN16 up to max. 85 °C

Temperature range, water:

PN16: 0–85 °C, PN10: 0–120 °C

Temperature range, air:

PN16: -10–85 °C, PN10: -10–120 °C

Used for installation with hot and cold tap water. Also used for brine systems, heating water and compressed air. Can also be used for heating systems.

Bib cock ball valves

Bib cock ball valves for hot and cold tap water

Bib cock ball valve with male thread and hose union. Valve body in nickel plated brass with aluminium butterfly handle and blow-out proof stem.

Size range: G15 – G20

Pressure class: PN16

Working temperature 0–95 °C

Used for installation with hot and cold tap water. Can also be used with own water. RISE type approval no: SC0591-16.
